Professional Papers, 1948-1999

| **Correspondence and Letters**

| **Finances**

Photographs and Slides, 1924-1997

Most photographs, slides, and negatives relate to James Webb's personal life or are unidentified.

| **Photographs, 1924-1997**

| #4 Briarbridge - Winter, 1982-1983 [Box 63, Folder 543]

| **Slides and Negatives, 1951-1986**

| #4 Briarbridge [Box 88, Folder 809]

| #4 Briarbridge, Hooperlane, 201 Rosemary St., Spring 1983 [Box 51, Folder 516]
Scope and Content Note: Slides.

| Baltimore, Briarbridge, Rosemary St. Bldg. [Box 51, Folder 513]
Scope and Content Note: Slides.

| Henderson, Lucille - Garden; #4 Briarbridge, 1986 [Box 51, Folder 515]
Scope and Content Note: Slides.

Videos, 1990-1991

Contents of the videos also relate to Webb's personal life.

Artifacts

Artifacts include the sign from the Rosemary-Henderson Street Building and architectural planning instruments.

John B. Webb Papers, 1922-1988

John Bruce Webb (1910-1997) was the brother of James Webb.

Papers in the John B. Webb series are divided into project files, personal papers and photographs. Project files include papers from California architectural projects and the John F. Kennedy gravesite in Arlington, Virginia. Personal papers include correspondence, documentation from the Webb home at #36 Tamalpais in Berkeley, and other miscellaneous documents. Most of the photographs series comprises personal photos of people and places in California and Japan.

| **Personal Papers, 1922-1998**

Usability Questions

- ☐ Should we show series with no matches?
- ☐ How do we make sure the user understands there was a dynamic change based on the search?
- ☐ Should there be highlighting?
- ☐ Should we leave multiple search boxes on the page?

Technical Implementation

- JavaScript, so everything is happening clientside.
- jQuery JavaScript library and the jQuery plugin “quicksearch”

Links

□ Links to the jQuery quicksearch plugin:

□ demo: <http://lomalogue.com/jquery/quicksearch/>

□ code: <http://github.com/riklomas/quicksearch>

Steps to Implementation

- ❑ 1. Include jQuery script in the head of HTML
- ❑ 2. Include quicksearch script in head of HTML

Steps (contd.)

- ❑ 3. Include this script tag in the head. The input and div selectors will depend on your HTML markup.

```
<script type="text/javascript">
    $(function () {
        $('input#quicksearch').quicksearch('div#dsc div.line', {
            'delay': 300
        });
    });
</script>
```

- ❑ 4. Include an input method in the body somewhere that has an id which matches the one specified in the above script.

```
<input type="text" id="quicksearch" value="" name="search">
```

Demo

A horizontal bar consisting of a small dark red square followed by a long orange rectangle.
