<p>1. We relied on office staff appraisal of the one collection that has come to us so far. We were not expecting any e-records with that collection, but rec'd several magnetic tapes and have never accessed them. They were discovered after the project archivist (who didn't deal with them) left the job and we have never gotten back to finding out what they are or what's on them. Current discussions with two offices discuss their management of e-files, but nothing has been transferred to us yet. Definitely concerned about what will be involved when that eventually happens.</p>	Fri, Jul 31, 2009 8:22 AM	
<p>2. I feel that consistent professional standards need to be implemented across repositories for the preservation and access to electronic records.</p>	Mon, Jul 27, 2009 12:57 PM	
<p>3. We have only one collection with electronic records - Congressional CMS files. A private firm captured the files and put them on CDs. The CMS and private firm's software programs appear to be proprietary; we do not have the software or know anything about it and cannot open those files.</p>	Mon, Jul 27, 2009 12:48 PM

|-----|--|----------------------------|
| 4.  | I am the first archivist for my institution, so we are both learning a lot. I have noticed that administration does listen to my concerns and we are working with a limited budget. The only electronic records I have found so far have been photographs.                                   | Mon, Jul 27, 2009 8:00 AM  |
| 5.  | Confident that we can preserve paper, and worried about the long term viability of electronic records, we ask our donors to print out important e-records and our donors do this.  | Mon, Jul 27, 2009 7:04 AM  |
| 6.  | Our current congressman for this district is concerned about digital preservation. But in our understanding based on recent meeting, that no long term solutions have been found because of proprietary software used in congressional offices which may not be accessible to the repository | Mon, Jul 27, 2009 7:01 AM  |
| 7.  | Not enough experience to know. Email was received as print-outs. However, we have digitized a great deal of microfilm, photographs, and a/v material to CD and DVD that are available onsite. In older congressional collections, media is the killer, not electronic records.               | Wed, Jun 24, 2009 7:42 AM  |
| 8.  | We are currently refining a policy for the appraisal of all electronic records. currently discussions take place at the time of negotiation and accession to explicitly state what our capability is for access, storage, migration, and longterm preservation of electronic media.          | Mon, Jun 8, 2009 11:36 AM  |
| 9.  | Our congressional collections are all more than ten years old with only a few e-records. We're just beginning to think about this problem. The problem is becoming more urgent as we anticipate collecting the records of current members.   | Fri, May 15, 2009 11:43 AM |
| 10. | We are still looking for new ways to process and provide access to these records. There seems to be no one tool or way to handle them.   | Thu, May 14, 2009 12:44 PM |
