A Collaborative Effort to Plan a Digital Preservation Program at a Small Library

FATEMAH REZAEI and LAURA BELL

Abstract: The Special Collections & Archives and other departments of the University of Baltimore's Robert L. Bogomolny (RLB) Library hold numerous audiovisual and textual digital resources. These materials are at risk without a digital preservation program. This poster presentation showcases the collaborative ongoing effort to gain support and plan for a digital preservation program at the RLB Library. A team of archivists and librarians formed the Digital Preservation Task Force at the RLB Library in 2019 and are currently in the process of developing a digital preservation policy and workflow for the library. This poster will illustrate the context of this project and the steps taken so far, including the use of Charles Dollar and Lori Ashley's Digital Preservation Capability Maturity Model (DPCMM) assessment tool as a method to gain support from and engage Library leadership regarding digital preservation. The poster will highlight the importance of a collaborative task force crossing Library departments and the archives, and the task force's agenda for the first year of a five year plan to foster and build the foundation for a digital preservation program in the library.

This poster illustrates the ongoing work and plans of the Digital Preservation Task Force at the RLB Library. It is hoped that this poster presentation will open discussion regarding digital preservation planning and implementation in smaller institutions.

About the authors:

Fatemeh Rezaei is currently the Archivist for institutional records and audio-visual collections; and she leads instruction sessions in archival literacy and research using primary sources at the Special Collections and Archives, University of Baltimore. Fatemeh holds Bachelor's and Master's degrees of Library Science from Allameh Tabataba'i University in Tehran, Iran. Fatemeh's research focuses on knowledge management infrastructures, and digital curation and digital preservation.

Laura Bell is currently the Processing Archivist at the Special Collections and Archives, University of Baltimore. Within the department her focus is the collection management of the Baltimore Regional Studies Archives. Laura holds an M.L.S. with a Specialization in Archives and Records Management from Indiana University, Bloomington and a B.A. in English from St. Mary's College of Maryland. Laura's research interests are constantly developing and include digital curation and preservation initiatives.
