

Centralized Born-Digital Processing at Wilson Special Collections Library

JESSICA VENLET

Abstract: Born-digital accessioning, processing, and ingest work has been handled in a variety of ways at the UNC-CH Libraries' Wilson Special Collections since about 2010. In this presentation, I will discuss our recent process to develop a service for centralized processing and ingest of born-digital collections and the inaugural year (August 2018 - August 2019) of our newly implemented Digital Preservation Lab.

About the Author:

Jessica Venlet works as the Assistant University Archivist for Digital Records and Records Management at the UNC at Chapel Hill Libraries' Wilson Special Collections. In this role, she is responsible for a variety of things related to both records management and digital preservation. She earned a Master of Science in Information degree from the University of Michigan.
